- JAVA-BEGINNER
- MARKETING
- COMMUNICATION AND LEADERSHIP

PROJECTS

Personal Portfolio Website

The website is made using HTML, CSS and JS . It displays all my skills and personal information . Can be used to contact me as it has linked form within. A different way of displaying CV.

Quiz Application using JAVA GUI

I developed a quiz application in Java using a Graphical User Interface (GUI) to enhance the user experience. The application included multiple choice questions, with the questions and answers stored in a database.

The application also provided feedback to the user, letting them know whether their answer was correct or incorrect.

Tic Tac Toe game using C

The game contains 3x3 grid on the screen , each cell is numbered from 1-9 . The 2 players can decide where to place their respective inputs that is "X or O". The player with having 3 consecutive inputs in the same line in any direction wins the round . The result is displayed at the end.
